## TECH-ARROW - WE ARE RIDING AHEAD OF THE WAVE

In today's world one can only succeed if he is coming up with innovative ideas and products before others have even thought about it. We believe that innovation is an instant process so finding new ways for creating software products for you is our everyday effort. Being innovative means for us, that we are adapting quickly and taking new challenges to stay on the road of the continuous improvement.

We stick to these values in order to provide the best of breed products to YOU!

To help you to recognize us for the very first sight, we have decided to change our corporate identity. We want to be recognized as the company who executes your vision about solving your business problems and provides you products which help you to evolve your own company. Simply said: TECH-ARROW becomes "YOUR vision of YOUR technological EVOLUTION".

Our new logo has already inspired a lot of people, saying: "It is a paper airplane from below", "looks like filling the gap", "an unusual arrow" or "a wedge". We are happy with all these explanations. Our logo should inspire people and at the end TECH-ARROW becomes "your vision of technological evolution". We have a brand new corporate identity design for our logo, company documents, and company website. Our products are also reflecting the renewed brand not only visually but they also include a bunch of features.

We are happy to share the new TECH-ARROW with YOU!

## THE GATE SUITE - PRODUCTS WHICH ARE SIMPLY WORKING TOGETHER

We are happy to announce the new generation of the GATE SUITE. The product suite consist of software products to help you to access, share, manage and archive of your company documents and information anytime from any device.

The flagship products **contentGATE** and **contentACCESS** were greatly improved and extended. Please welcome our new products **accessGATE** and **officeGATE**!

Our all products are reflecting the new brand design and you can easily recognize them by their unified logo and unique color.

You will learn about the new features and products in our upcoming newsletters.

## DETAILS MAKE THE DIFFERENCE

contentGATE

contentGATE supports already 12 email archive connectors. Recently contentGATE was extended with a new connector to IBM Content Collector. IBM ICC can be used as a source for email migrations. contentGATE also supports OpenText Archive Server 10.5. Another new feature is the PST to Office365 migration – easily migrate PST files to Office365 mailboxes or archive mailboxes. The new contentGATE comes with many performance improvements and is also available as a 64-bit application. The database model was reshaped to support a wider range of archive systems (including asynchronous systems).

contentACCESS

contentACCESS is now shipped with a simple and fully automated installer which is installing also the prerequisites for you. The new version comes with multi-tenant support (for cloud managed services) and with brand new web-based configuration. New plugins were introduced: for classification, categorization, archiving and information management of MS Exchange emails and MS SharePoint documents and items. Processing Public Folders was added in addition to normal mailboxes. contentACCESS supports storage back-ends such as MS Azure, MS SharePoint, iTernity and several DMS systems.

accessGATE

accessGATE integrates your DMS, ERP and ECM systems with SharePoint. accessGATE now supports 4 levels of SharePoint integration: Basic, Compact, Classic and Comfort. The Basic level allows a basic search over your DMS data integrated in SharePoint. The Compact level creates a virtual view of your DMS data inside SharePoint. The Classic level integrates the SharePoint search with your DMS data, allowing to use all features of the SharePoint Search. The Comfort level offers a so called "VIRTUAL MOVE" one-way synchronization of your data into SharePoint without moving the physical data to SharePoint. accessGATE is using a dynamic SharePoint model definition, allowing to integrate your DMS, ERP and ECM systems even more easier.

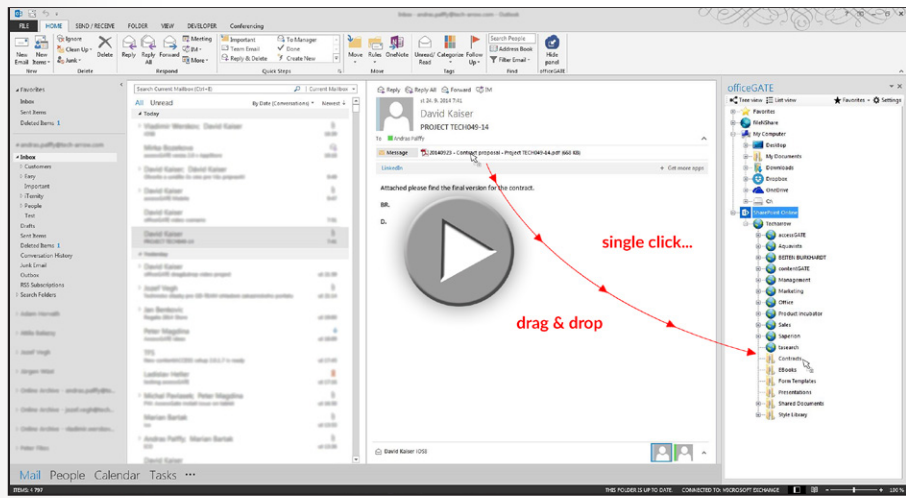

contentWEB

contentWEB is now integrated with contentACCESS, allowing to visualize emails, SharePoint items and also documents from several DMS/ERP/ECM systems processed or accessed by your contentACCESS plugins.

## UNDER THE HOOD - officeGATE

Are you desperate how many steps do you need to upload an email attachment to SharePoint? We are introducing officeGATE where this action takes you only a SINGLE click!

The product: officeGATE is a product integrated into MS Outlook 2010 and later versions. The installation adds an add-in to your Outlook. And why is this add-in so special? officeGATE connects your email client with your local file-system, with your SharePoint on premise or SharePoint online site or you can build a connection to MS OneDrive or third party cloud solutions like Dropbox or fileNshare. The main benefit of the add-in is making you able to easily upload and download message attachments from/to all providers. The great function: Drag&Drop to Outlook works two ways, e.g. you can attach-copy the file or create only a link. Helpful are Favorites where you can pre-define your working folders without any further need to browse them through the Folder-tree. It is obvious that you can edit folders or files directly in this add-in without any further need to leave the Outlook application. And this was just a beginning. Another great functionality enhancement is to be expected focusing on SharePoint.

Try this product and you won't miss these functionalities anymore!

We are proudly introducing our youngest product **officeGATE**, which is a powerful tool for helping to organize your data more simply and effectively. The idea came from a simple feature request to solve the attachments handling as easiest as possible from and into emails, especially together with SharePoint access. The Product Manager for this great tool is András Pálffy, who is responsible not only for the product functionality but he is also taking part in the development process. András took it very simple, he created a single tool and shared it between TECH-ARROW colleagues to use it. And of course he asked them to tell the opinion, send requests and suggestions. And it worked. People began to use officeGATE and the sympathy for this product had grown all the time new features were added.

## REACHING NEW SHORES – New subsidiary TECH-ARROW GmbH

We are proudly announcing, that we have founded our first international subsidiary in Nürnberg. TECH-ARROW GmbH, our youngest company is led by Jürgen Wüst a long year document management and collaboration executive, who covers the DACH (Germany, Austria and Switzerland) region. From now on we are closer to our customers in this region because we want to interact with our customers more in person and want to be more effective servicing their needs.

We are mainly focused on providing products for MS Exchange, MS SharePoint Office 365 on premise as well as on cloud.

Our products contentGATE and contentACCESS are helping you with E-mail, ECM, ERP and DMS migration, management and archiving. accessGATE is highly flexible for improving instant access and collaboration to your SharePoint, ECM, ERP and DMS data.

In the Interview with Jürgen he is revealing the goals where TECH-ARROW GmbH will address the DACH market with products for such a special areas as collaboration, migration, accessibility and information management.

## TECH-ARROW's life

One of the biggest sport event this year was the 2014 FIFA World Cup in Brazil. TECH-ARROW launched parallel to this event its own Foosball Cup 2014. Foosball, or table Football is a table-top game and sport. The playfield is a table with 8 rods and 'table soccer' figures all over with a ball and some handles. There is a goal at each end and table to serve on each side in the middle. The game is really fast and funny and everyone cheers and laughs. Those TECH-ARROW's Employee who had been qualified themselves in the basic groups, fought each other after working hours and during lunch breaks. After several weeks of fun and hard games András Katona from the Development is the winner of 2014's TECH-ARROW Foosball Cup.
