

contentACCESS

archive and backup for Microsoft 365

TECH-ARROW's contentACCESS offers you an intelligent and modern **email archive and backup**. We offer an easy and approachable enterprise solution for your organization that can be implemented flexibly as either on-premise or on the Cloud. Take advantage of our all-in-one access to all archived emails and attachments! With contentACCESS, we can help keep your critical business information safe and secure – long-term, and without impacting ease of access and productivity.

Archive and backup your

We offer

Archive

Ensure long-term retention of your emails and attachments, compliance with legal eDiscovery requirements, and offloading of your live email server without sacrificing discoverability or productivity thanks to our intuitive search system.

Backup

Guarantee safety and protection for your critical business data and the ability to selectively or fully restore your emails in the event of corruption, accidents or deliberate deletion.

Multiple systems

We cover Microsoft Exchange and Exchange Online, as well as Zimbra, Lotus Notes, Gmail, or other SMTP-based email systems.

Key features

Unified solution for both archive and backup

Combine both an archive and a backup solution in one system, covering the common use cases for either ranging from providing a simple backup to long-term email retention through the email's complete life cycle

Deduplication and compression

Take advantage of our advanced deduplication and compression technology to reduce storage volumes of both email text and attachments. Ensure efficient use of your storage, speeding up your data transfers and backups

Instant access to the archive and backup data without the need for recovery

Don't wait for a full restore or admin intervention; contentACCESS provides fast and easy access to critical emails when and where you need it, through either our online web access tool, mobile app or Outlook integration. Whether from home, from the office or on the move, keep your stored emails at your fingertips

Advanced search and filters

Speed up your workflows and guarantee lightning-fast access to archived information. Our full-text indexing and searching across all relevant data including attachments gives you consistent and reliable results

How much could your organization save on storage costs?

Compress your stored data by

70%

EU GDPR compliance

Where are your emails located, how long are they retained, and who is authorized to access them? With contentACCESS, you always maintain full control. Ensure easy compliance with the Right To Be Forgotten or other GDPR mandates

Offline archive access

Maintain instant access to your key emails on the move – keep a local version of your archived data constantly available. Work on without internet connection and without a problem

Fast restore of archived content

Selectively rehydrate emails from your archive back into the mailbox. Take advantage of instant response to frame your disaster recovery planning and keep downtime a thing of your past

Easy access to data

Critical data from all internal systems made quickly and easily accessible via either Microsoft clients such as Outlook and Teams, or through our own Online Web Portal and Mobile App

Offloading - optimization of server performance

Cut down on overflow costs by offloading excess emails from your live server to your archive, or sustain access to former employees' mailboxes without maintaining their M365 subscriptions. Lighten the load on your servers and optimize server performance

Benefits

Cost savings

Reduce your ongoing subscription and storage costs

Through contentACCESS, we can help eliminate the need to maintain licenses of former employees while ensuring continued access to their historical data. We can therefore optimize your business structure by removing the need to pay for Exchange's native archive mailbox feature while overcoming your storage limits

Safety and security

We protect your stored critical business information, helping prevent any potential costs on your organization stemming from data loss and deletion (both intentional and accidental) as well as external action, ransomware or cyberattacks

Effective and secure data storage

Take advantage of our intelligent deduplication and efficient storage structure to reduce your storage. Our archive and backup support various storage systems, including Amazon S3, Azure Blob Store, WORM-certified storage systems, as well as common SAN/NAS/CAS compatible systems and more

Data security

One solution for Archive and Backup

Experience the world's best unified archive and backup! In addition to archiving Exchange and Exchange Online, contentACCESS can cover a wide variety of data sources under the MS365 umbrella under a single system

Securely stored

All information placed in our archive and backup is fully encrypted with your own generated certificate, keeping it safe and unreadable by anyone else

Multiple copies / data redundancy

Disasterproof your storage! Even in the case of hardware failure or malicious action, we offer the possibility of using our replication feature to maintain intact redundant copies of critical emails and mailboxes

Productivity

Improves productivity

Thanks to our unified system, work with stored mailboxes like never before! Access, search and retrieve required emails or their attachments quickly and efficiently thanks to our intuitive user interface and powerful full-text search system

Easy end-user access to Archive and Backup

Remove bottlenecks to your workflows. With contentACCESS, you can allow for easy and secure end-user access to archived mailboxes. Improve workplace efficiency and guarantee constant access to needed information – anytime, from any place, leveraging access through both Online Web Access as well as Mobile applications

Easy to administrate

Take advantage of our unified archive and backup structure to easily administer your archive and backup through our intuitive interface. Set organization-wide rules and policies, manage user access, and oversee user actions through the audit trail

Three flexible configuration options

Set up your archive and backup system in:

- Cloud:** leverage the possibility of using contentACCESS in the form of SaaS, built on the basis of a monthly fee, including storage and access to all available TECH-ARROW services
- Hybrid:** Allow for a split user base – partly on the Cloud and partly On-premise; with contentACCESS, even with this model, you can manage all your users through a single interface
- On-premise:** A one-time license purchase with installation on your infrastructure, with full control over your storage

Who we are

TECH-ARROW was founded with the goal to create a unified and modern archive and backup solution meeting all future needs of the rapidly changing world of data security and retention. We have been continuously growing over the last ten years to meet our vision of technological evolution in the world of secure data archiving and intelligent backups. During this time, we have also worked on expanding our wide range of products to best represent the needs of our clients and reflect developments in a rapidly evolving market.

Operating globally, with over a thousand current and former clients representing a variety of industries, TECH-ARROW stands ready and waiting to help your organization tackle your data migration, archiving or data backup needs.
