

contentACCESS

archive and backup for SharePoint and OneDrive

TECH-ARROW's contentACCESS offers you an intelligent and **modern archive and backup for your Microsoft SharePoint and OneDrive**. We offer an easy and approachable enterprise solution for your organization that can be implemented flexibly as either on-premise or on the Cloud. Take advantage of our **all-in-one access** to all archived files from a full range of data sources! With contentACCESS, we can help keep your critical business information **safe and secure** – long-term, and without impacting ease of access and productivity.

Archive and backup your

We offer

Archive

Ensure long-term retention of your critical information, compliance with legal eDiscovery requirements, and offloading of your live system - while still maintaining transparent access without sacrificing discoverability or productivity thanks to our intuitive search system.

Backup

Guarantee safety and protection for your critical business data and the ability to selectively or fully restore your files in the event of corruption, accidents or deliberate action.

Key features

All-in-one archive and backup for Microsoft 365

Combine both an archive and a backup solution in one system, covering the common use cases for either ranging from providing a simple backup to long-term data retention

Deduplication and compression

Take advantage of our advanced deduplication and compression technology to reduce storage volumes. Ensure efficient use of your storage, speeding up your data transfers and backups

Instant access to the archive and backup data without the need for recovery

Don't wait for a full restore or admin intervention; contentACCESS provides fast, easy and transparent access to critical information when and where you need it, through either SharePoint itself, our online web access tool, our mobile app or Outlook integration. Whether from home, from the office or on the move, keep your data at your fingertips

Advanced search and filters

Speed up your workflows and guarantee lightning-fast access to archived information from all your Microsoft 365 data sources. Our full-text indexing and searching across all relevant data gives you consistent and reliable results all in one module

EU GDPR compliance

Where is your data located, how long is it retained, and who is authorized to access it? With contentACCESS, you always have full control. Ensure easy compliance with the Right To Be Forgotten or other GDPR mandates.

**SharePoint charges
0.20 USD/GB for
data over their 1 TB
plus 10 GB per
license limit**

How much could your organization save with a more effective storage solution?

Secure sharing module

The sharing module manages access and retention of your files, keeping a complete monitoring log for all downloads from both internal and external contacts. Share, cooperate and coordinate efficiently

Offline archive access

Maintain instant access to your critical files on the move – keep a local version of your archived data constantly available. Work on without internet connection and without a problem

Fast restore of archived content

Selectively rehydrate data from your archive back to the live system. Take advantage of instant response to frame your disaster recovery planning and keep downtime a thing of your past

Easy access to data

Critical data from all internal systems made quickly and easily accessible from the archive via SharePoint, through our own Online Web Portal and Mobile App, or through other Microsoft clients such as Outlook and Teams

Offloading - optimization of server performance

Cut down on overflow costs by offloading excess data from your live system to your archive, or sustain access to former employees' SharePoint subscriptions. Lighten the load on your servers and optimize server performance

Benefits

Cost savings

Reduce your ongoing subscription and storage costs

Through contentACCESS, we can lessen SharePoint storage volume and eliminate any potential monthly overflow costs through offloading SharePoint Online, Exchange Online and MS Teams. In addition, we can help eliminate the need to maintain licenses of former employees to ensure continued access to their historical data

Safety and security

We protect your stored critical business information, helping prevent any potential costs on your organization stemming from data loss and deletion (both intentional and accidental) as well as external action, ransomware or cyberattacks

Effective and secure data storage

Take advantage of our intelligent deduplication and efficient storage structure to reduce your storage. Our archive and backup support various storage systems, including Amazon S3, Azure Blob Store, WORM-certified storage systems, as well as common SAN/NAS/CAS compatible systems and more

Data security

One solution for Archive and Backup

Experience the world's best unified archive and backup! Access and manage your archived files from all data sources through a single system. Benefit from instant and easy access to data or in times of need take advantage of our fast granular restore of individual files or data to maintain your business continuity

Securely stored

All information placed in our archive and backup is fully encrypted with your own generated certificate. Keep your organization's data private, with no unauthorized external access.

Multiple copies / data redundancy

Disasterproof your storage! Even in the case of hardware failure or malicious action, we offer the possibility of using our replication feature to maintain intact redundant copies of critical data

Productivity

Improves productivity

Thanks to our unified system, work with stored data like never before! Access, search and retrieve required information quickly and efficiently regardless of data source or file type thanks to our intuitive user interface and powerful full-text search system

Easy end-user access to Archive and Backup

Remove bottlenecks to your workflows. With contentACCESS, you can allow for easy end-user access to archived files. Improve workplace efficiency and guarantee constant access to needed files – anytime, from any place, leveraging access through both Online Web Access as well as Mobile applications

Easy to administrate

Take advantage of our unified archive and backup structure to easily administer all data sources through one interface. Set organization-wide rules and policies, manage user access, and oversee user actions through the audit trail

Three flexible configuration options

Set up your archive and backup system in:

- Cloud:** leverage the possibility of using contentACCESS in the form of SaaS, built on the basis of a monthly fee, including storage and access to all available TECH-ARROW services
- Hybrid:** Allow for a split user base – partly on the Cloud and partly On-premise; with contentACCESS, even with this model, you can manage all your users through a single interface
- On-premise:** A one-time license purchase with installation on your infrastructure, with full control over your storage

Who we are

TECH-ARROW was founded with the goal to create a unified and modern archive and backup solution meeting all future needs of the rapidly changing world of data security and retention. We have been continuously growing over the last ten years to meet our vision of technological evolution in the world of secure data archiving and intelligent backups. During this time, we have also worked on expanding our wide range of products to best represent the needs of our clients and reflect developments in a rapidly evolving market.

Operating globally, with over a thousand current and former clients representing a variety of industries, TECH-ARROW stands ready and waiting to help your organization tackle your data migration, archiving or data backup needs.
