

contentACCESS archive and backup for Microsoft Teams

TECH-ARROW's contentACCESS offers you an intelligent and modern **archive and backup for your Microsoft Teams**. We offer an easy and approachable enterprise solution for your organization that can be implemented flexibly as either on-premise or on the Cloud. Take advantage of our **all-in-one access** to all archived messages and attachments! With contentACCESS, we can help keep your critical business information **safe and secure** – long-term, and without impacting ease of access and productivity.

Archive and backup your

We offer

Archive

Ensure long-term retention of all your complete Teams data including posts, private chat and uploaded files. At the same time, maintain compliance with legal eDiscovery requirements, and offload your live Teams server without sacrificing transparency, discoverability or productivity thanks to our intuitive search system.

Backup

Guarantee safety and protection for your Microsoft Teams, and the ability to selectively or fully restore your data in the event of corruption, accidents or deliberate deletion.

Key features

Combined solution for both archive and backup

Combine both a Microsoft Teams archive and a backup solution in one system, covering the common use cases for either ranging from providing a simple backup to long-term data retention through the data's complete life cycle

Deduplication and compression

Take advantage of our advanced deduplication and compression technology to reduce storage volumes of both text and files. Ensure efficient use of your storage, speeding up your data transfers and backups

Instant access to your data without the need for recovery

Don't wait for a full restore or admin intervention; contentACCESS provides fast, easy and transparent access to critical Teams data when and where you need it, through either our online web access tool, mobile app or Outlook integration. Whether from home, from the office or on the move, keep your stored messages at your fingertips

Advanced search and filters

Speed up your workflows and guarantee lightning-fast access to archived information. Our full-text indexing and searching across all relevant Teams content including your uploaded files gives you consistent and reliable results

Over

1 mil.

organizations use Microsoft Teams as their default messaging platform

How well can you retain your critical communications through this channel?

EU GDPR compliance

Where is your data located, how long is it retained, and who is authorized to access it? With contentACCESS, you always maintain full control. Ensure easy compliance with the Right To Be Forgotten or other GDPR mandates

Offline archive access

Maintain instant access to your key data on the move – keep a local version of your archived information constantly available. Work on without an internet connection and without a problem

Fast restore of archived content

Selectively rehydrate data from your archive back into your Teams system. Take advantage of instant responsiveness to frame your disaster recovery planning and keep downtime a thing of your past

Easy access to data

Critical data from all internal systems made quickly and easily accessible via either Microsoft Teams, through our own Online Web Portal and Mobile App, or through Microsoft Outlook

Complete data capture

With contentACCESS, we preserve not only individual Chat and Post texts but also associated uploaded files and reactions which are connected to the original message, as well as their placement in Teams and other subgroups. Never lose the full context!

Benefits

Cost savings

Reduce your ongoing subscription costs

Through contentACCESS, we can help maintain access to former employees Teams chats and thus preserve business continuity without having to continue paying said employee's subscription to the service and keeping their account active

Safety and security

We protect your stored critical business information, helping prevent any potential costs on your organization stemming from data loss and deletion (both intentional and accidental) as well as external action, ransomware or cyberattacks

Effective and secure data storage

Take advantage of our intelligent deduplication and efficient storage structure to reduce your storage. Our archive and backup support various storage systems, including Amazon S3, Azure Blob Store, WORM-certified storage systems, as well as common SAN/NAS/CAS compatible systems and more

Data security

One solution for Archive and Backup

Experience the world's best unified archive and backup! In addition to archiving Microsoft Teams, contentACCESS can cover a wide variety of data sources from the Microsoft 365 umbrella under a single system. Benefit from instant and easy access to data - regardless of source or file type!

Securely stored

All information placed in our archive and backup is fully encrypted with your own generated certificate. And in times of need, take advantage of our fast granular restore of individual files or data to maintain business continuity

Multiple copies / data redundancy

Disasterproof your storage! Even in the case of hardware failure or malicious action, we offer the possibility of using our replication feature to maintain intact redundant copies of critical pieces of data

Productivity

Improves productivity

Thanks to our unified system, work with stored data like never before! Access, search and retrieve required posts or uploaded files quickly and efficiently thanks to our intuitive user interface and powerful full-text search system

Easy end-user access to Archive and Backup

Remove bottlenecks to your workflows. With contentACCESS, you can allow for easy and secure end-user access to archived Teams data. Improve workplace efficiency and guarantee constant access to needed information – anytime, from any place, leveraging access through both Online Web Access as well as Mobile applications

Easy to administrate

Take advantage of our unified archive and backup structure to easily administer your archive and backup through our intuitive interface. Set organization-wide rules and policies, manage user access, and oversee user actions through the audit trail

Three flexible configuration options

Set up your archive and backup system in:

- Cloud:** leverage the possibility of using contentACCESS in the form of SaaS, built on the basis of a monthly fee, including storage and access to all available TECH-ARROW services
- Hybrid:** Allow for a split user base – partly on the Cloud and partly On-premise; with contentACCESS, even with this model, you can manage all your users through a single interface
- On-premise:** A one-time license purchase with installation on your infrastructure, with full control over your storage

Who we are

TECH-ARROW was founded with the goal to create a unified and modern archive and backup solution meeting all future needs of the rapidly changing world of data security and retention. We have been continuously growing over the last ten years to meet our vision of technological evolution in the world of secure data archiving and intelligent backups. During this time, we have also worked on expanding our wide range of products to best represent the needs of our clients and reflect developments in a rapidly evolving market.

Operating globally, with over a thousand current and former clients representing a variety of industries, TECH-ARROW stands ready and waiting to help your organization tackle your data migration, archiving or data backup needs.
