contentGATE Migrator
Migrate, consolidate and optimize

TECH-ARROW's contentGATE gives your organization a **fast, secure** and **reliable** method of migrating your existing legacy data, whether it is email, file or metadata. Choose a process that can easily and securely handle the entire migration process and provide an automatic, reliable, and globally recognized migration solution for **more than 25 source systems** including legacy email archives, email servers, or DMS/ECM systems.

Migrate, consolidate and optimize
Your legacy archives and source systems

contentGATE ── more than 25 source systems

We offer

Migration
of email archives, mailboxes or additional sources to and from third-party systems

Consolidation
of your archived data from multiple sources into a single target system

Optimization
of your storage structures to save storage space, costs and time

Compliance
with existing regulatory frameworks and mandates and maintaining chain of custody

Key features

Automatic and parallel process
We provide an optimal email archive migration experience! Once our migrator tool has connected to the source system and the target, the migration process requires minimal input and oversight while occurring faster than competing systems.

Flexible targeting
We migrate to and from over 25 different systems! Using contentGATE, you can transfer your live email mailboxes from providers such as Exchange, GroupWise, Gmail or Lotus Notes, as well as email archives stored in Metalogix Archive Manager, Saperion ELM, Enterprise Vault, Dell EMC SourceOne, IBM ICC or others.

Automatic source and target mailbox mapping
Our system automatically scans and maps your source and target structure, ensuring a complex and complete migration without any data loss or other complications. Begin using your new system with full confidence that everything is in its place.

Fully enclosed process
We offer a complete migration process from an initial proof-of-concept and concept of the solution, the installation of our tool, full migration process and monitoring as well as a post-migration check and verification. We're with you for every step of the way with full support and communication.
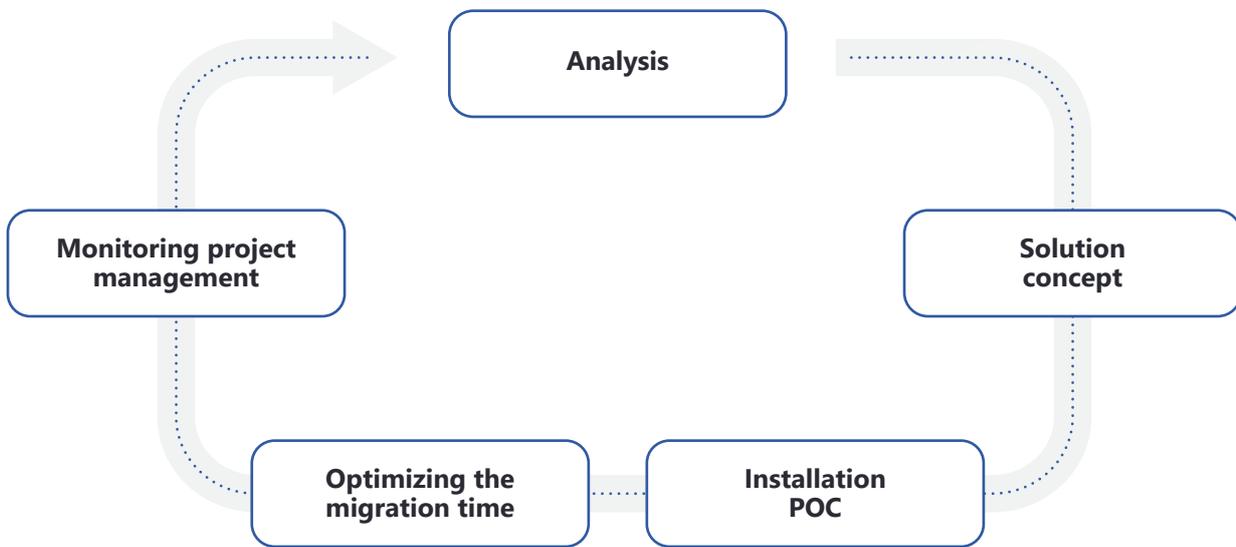

Support for different migration workflows
Decide on different processes during your migration, including migration from a source to a target archive, restoring mailboxes back into Exchange from email archives and more. Experience unparalleled flexibility for your systems!

Worldwide migration of more than

1 bln
items over 200+ projects!

Benefits

Cost savings

Secure and reliable

There's no need to worry about data loss through software or human error! contentGATE collects all info about your migrated emails into a report, giving you complete oversight of where your data has gone. The process automatically migrates the entire archive or selected portions while optionally replacing shortcuts with original emails. At need, the migration process is also fully reversible.

Fast and effective

With contentGATE, discover a scalable way of migrating multiple mailboxes at the same time! The system is designed to tackle migrations of various sizes depending on customer needs.

Easy and smart

Our connector system allows the migration to occur automatically and easily. Once the connector has accessed both the source system and the target destination, contentGATE reads the meta-data from the source database and connects to the Data Store , accessing archived emails without having to directly access the archive.

Data security

Automatic deduplication

Avoid migrating the same content twice! With deduplication an optional part of the migration process, contentGATE provides an excellent categorization mechanism. Choose how to handle your duplicates, and avoid unnecessary waste of your storage and save on storage costs!

Without interruption of business

Our migration process doesn't interrupt your day-to-day function – data from the source system is not deleted until the procedure is complete and your employees maintain constant access to their information as needed. The legacy system can remain in use until the migration is fully complete, without any outages.

Reliable partners

You're not alone! Through the entire migration process, TECH-ARROW stands by your side until the migration has finished. With twenty years of experience and hundreds of satisfied customers, you can rely on us to see your migration project through.

Intelligent Filtering Options

Exercise complete granular control over your migration! Our process allows your organization to set filters for what gets migrated with what priority, or at all.

Age

do you have emails or files long past their point of relevancy? Set an age based filter to ensure your new system is not clogged up with legacy information.

Message class

Use IPM tags to differentiate your emails and choose which to migrate over.

Document ID

Need to exclude certain messages? Enter their individual ID and selectively exclude them from the process!

Subject

Select subject based filters (for example *SPAM* tags) to avoid migrating excess emails, speeding up and smoothing out the process!

Address

Filter your emails by sender or reciever address, choosing which you want to migrate and which to leave.

Comprehensive Reporting

Keep a high-level overview of your migration! You can have our system generate a report granular down to the mailbox or PST level. On this report, in addition to total size and other statistics, you will find your migrated items classified into the following categories:

Successful migration

Failed migration

Remaining unmigrated items

Excluded from migration

Who we are

TECH-ARROW was founded with the goal to create a unified and modern archive and backup solution meeting all future needs of the rapidly changing world of data security and retention. We have been continuously growing over the last ten years to meet our vision of technological evolution in the world of secure data archiving and intelligent backups. During this time, we have also worked on expanding our wide range of products to best represent the needs of our clients and reflect developments in a rapidly evolving market.

Operating globally, with over a thousand current and former clients representing a variety of industries, TECH-ARROW stands ready and waiting to help your organization tackle your data migration, archiving or data backup needs.
